Projects

Map Vibes ⧉ 10/2022

Map Vibes is a Direction App that brings you the opportunity to explore new destinations in the world, and also takes you on a new adventure and experience in your own backyard.
Map Vibes is a new way to navigate through the world. Our app focuses on landmarks instead of distances, so users can find out what's across the way and make their own decisions about where to go.

Starlabs Internship Application ⧉ 02/2022 – 05/2022

Also during my internship at Starlabs, I have worked a bit on this project too.
This project is created to allow programmers to apply easier for an internship in Starlabs and the management in Starlabs can easier accept the right applicants because on this platform they will have tests and code problems to solve.
In this project, I have worked on Feedback Section, and the Export of accepted users.
We used Laravel to develop this platform.

Starlabs Intenship Hub ⧉ 02/2022 – 05/2022

During my internship at Starlabs, we worked on this project.
I and my team built this amazing platform for Starlabs Company, so they can manage their new interns.
This platform contains almost everything that you need to manage internships in a big company like Starlabs!
It contains a live chat for interns, team leaders, and management can chat with each other.
It has a fully functional Task Board where Team-Leaders give tasks to interns, also it has a Stack-overflow inside of it when interns can ask for problems or errors, etc...
And it is fully managed by management which can create teams, add technologies add interns to teams and a lot of Importing users from the Internship Application Platform and other things.
In this project, I have worked on a lot of features like Importing accepted Interns, Real-Time Chat, CRUDs, Teams Section, Blog Section, Technologies Section, Feedbacks Section, etc...
We used Laravel to develop this platform.

Feel the Space ⧉ 10/2021

Developed with: HTML, CSS, JS, PHP & MySql.
Feel the Space is a project that has SPACE as its main theme.
This platform provides accurate and fast information about the most important events in the field of Planetary Space and various events around it.
The index (front page) is very welcoming with animation through JavaScript.
It also offers e-Commerce with a variety of space products. This online store also contains the administrative part (/ admin) which makes it even easier to manage, add, change products and also manage sales, place discounts on products, etc ... Through phpmailer, every order is notified to the buyer via email, and the seller is also notified that a product has been ordered.
A Search Engine that allows through keywords the user can find the product he wants.
Perhaps one of the most important things in an e-Commerce is the Purchase step, but Feel the Space shop has managed this step very well making it one of the easiest where most information is stored and filled in automatically and you just have to choose the payment method!
Order History is one of the parts that Feel the Space shop offers.
We also offer a Subscription (Newsletter) where only email is required and you will receive the latest offers from us to NEVER miss them :)! (Newsletter is managed through the Admin section).
What is more important than the customer being able to get help online in case of need for a choice between products or any help therefore we have integrated a Live Chat.
Another important part is the forum which aims to unite people with common interests, ie "space".
The forum is a Chat Engine like WhatsApp where it enables group chats.
It works perfectly and quickly, allows sending Files and Photos, and much more.
This Chat Engine was created through REACT and Google&Facebook Auth and several other libraries.
So it is a dynamic web that offers content and ease of use for users and also offers very easy and good management for administrators and platform managers!

Covid-19 Statistics Web App ⧉   02/2021

At the time when we all needed to know more about covid-19 new cases, I used a javascript API using
React.js to get all new data in real-time.
Get files: https://github.com/denishotii/react-covid19-tracker.git

Tic Tac Toe Game ⧉   01/2021

Designed to play with no ads and to have fun with friends and family :)
You can play just with one player or with two players!
Worked with JavaScript!
Get files: https://github.com/denishotii/JavaScript-tic-tac-toe.git

Awards

Best "Open Source" Project, *Florian Bauer, Engage Technology | Tech Fest Albania 2022* ⧉   23/10/2022

During the 24-hour hackathon in Tech Fest Albania ⧉ , I and my team developed a platform "Map Vibes",
which won first place in the Open Sorce category.
Check out our project: https://github.com/denishotii/TechFest ⧉

November Code Fest 2021 Finalist, *Digital School*   27/11/2021

November Code Festival is organized by Digital School and is one of the biggest tech festivals in Kosovo.
I was also part of the November Code Festival with the project: "Feel the Space".
Where my project was chosen as one of the best in this Hackathon! 🥇

Hackathon Winners at KosICT Technology Festival., *KosICT*   23/10/2021

Part of the 10th edition of the KosICT Technology Festival. #kosictx During these two days of the
technology festival I had the opportunity to share my experiences and meet many startups and businesses
in the field of technology!
I was also part of the Hackathon organized by KosICT with the theme: "Back to the Future", as part of
@shkolladigjitaleofficial . Together with @valart_zk we have created the project: "Feel the Space".
Where we won first place in this Hackathon! 🥇
Have a look at Feel the Space web: Feel the Space ⧉

Organizations

NGO THY   09/2020 – present
Volunteering as a Facilitator and Project Assistant on some projects.   Prizren, Kosovo
Helping on TECH setup and others...

Publications

How to self-host Judge0 API on your PC locally | All you need to know, *Medium* ⧉   02/08/2022
In this article, you will find everything you need to know to self-host Judge0 API locally on your PC. We also
cover the part of setting up a Linux Distributor, installing Docker on your PC, and hosting Judge0 API in
your Virtual Box.

Is php DYING?, *Dookoo* ⧉   06/01/2022
Since I work with PHP myself I was concerned with the debate whether PHP is dying or not, so then I did
some research and came to the conclusion that no programming language dies and PHP is far from dead
especially with its new version PHP8.0 and also is used in more than 78% of the world's websites!
So we at Dookoo wrote this article!

Auto Update Copyright Year in a Website Dynamically using JavaScript & php (2022), *Dookoo* 02/01/2022

As the years have changed many websites forget to change the copyright years. So I want to share with you this article we at Dookoo wrote, which tells What is copyright?; Why you should update the copyright year!?; How you can update it?;

Also, we showed a piece of code on how just with some lines of code you can automate it using JavaScript and using PHP too!
